NEW ENROLMENT-BASED MEASURE OF NCEA ATTAINMENT

NZQA and the Ministry of Education have implemented a change to the way NCEA and University Entrance attainment is reported.

The new enrolment-based measure of NCEA attainment will replace NZQA's roll - based and participation-based measures. It provides a more precise picture of attainment. It counts all domestic students in years 11 to 13 aged less than 19 on 1 January, rather than taking a snapshot of students as at 1 July. It also counts up to three ethnicities students identify with, rather than limiting this to just one.

As a result, NZQA advises that most schools will see a change in their attainment rates. It is a statistical adjustment that doesn't reflect school performance, teaching practice or an individual student's results. Also, whilst NCEA and University Entrance attainment rates do change for most schools, the amount of improvement in student attainment over time is similar and positive using the enrolment-based measure.

NZQA has consulted with schools on the way attainment is reported at a school level. The enrolment-based measure will be used for reporting NCEA and University Entrance attainment statistics from January 2019.

More information can be found on the NZQA website:
