

To all the Nurses and Doctors

21.04.20

I should start by saying thank you

Thank you

For all the hard work and effort you put

Into helping people, but that is not the half of

It. You spend all your time away from your families

And children and when you are finished your shift

You're not even allowed to go home and see them.

Thanking you all from my house in Northland, Kerikeri

Take care.

From Monique Topia.
