

Dear Doctors,

Thank you

so much for working during this awful pandemic

It must be scary looking after all those patients

And risking your life for other people

Knowing that you may have the COVID19

And still have to go back to your family

You have to treat people

Who are very sick

And watch others die

What a horrible thing to see

You are working very hard

To save us all

Thank you.

Even just working as a doctor sounds complicated

But a doctor during the COVID19 crisis sounds even worse

You have to work through tears and heartaches

Worries and fears

Thank you for working so hard to save as many people as possible

Thank you.

A grateful isolated NZ citizen

Natalie Collins
