Kia tupato Ki te kowhai  
Beware Yellow

# TOGETHER WE CAN CHANGE LIVES! YOUR VOICE IS POWERFUL

Every month a precious baby is born in Aotearoa with severe liver disease - more than half of them are Pacific and Māori tamariki

The good news? Early treatment significantly improves their chance of survival

By screening babies, we can catch this disease early and give them the best start in life.

Please join us for a **kōrero/talanoa/discussion** and tell us what would work best for your baby and whānau.

Please RSVP and see details below.

Friday, 27th June 2025

9:30am - 1pm

Little theatre, Te Ahu

Corner of State Highway One and Matthews Avenue, Kaitiaia

Food and refreshments provided
